SUMMARY

- Dynamic and results-oriented professional with a robust background in software engineering with an MBA in Business Analytics.
- Passionate about leveraging data to drive strategic decisions and business growth, I excel in data analysis, mining, and visualization using tools like Python, SQL, Power BI, and Excel.
- Seeking to apply my technical expertise and analytical acumen in a role that allows me to harness the power of analytics to solve complex challenges and make a meaningful impact.

EDUCATION

Dr. Vishwanath Karad MIT World Peace University

Pune, India

MBA in Business Analytics

Aug 2023 - May 2025

Pune University

Pune, India

Bachelors of Engineering – Computer Engineering

Aug 2016 - May 2020

TECHNICAL SKILLS

Certification: Google certified: Agile Project Management

Programming languages: Python, HTML, CSS, Java, JavaScript, C, Golang

Databases: MySQL, MS SQL Server Management Studio

Libraries and tools: NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, PyTorch, Spark.

Business intelligence tools: Tableau, Microsoft Power BI, Microsoft Excel.

WORK EXPERIENCE

Data Analyst – Osmos.ai, Pune

Jun 2025 - Present

- Analyzed advertising campaign performance across 40+ retail media marketplaces, performing end-to-end root cause analysis across campaign KPIs and funnel metrics to **resolve 20+ performance investigations weekly**.
- Queried and analysed advertising data using **Big Query, Python (Pandas)** to uncover campaign trends, validate performance anomalies and deliver data-driven recommendations to business stakeholders.
- Built **automated Sheets and Power BI dashboards** for campaign performance tracking, enabling faster reporting and improving visibility into marketplace health. This also allowed us to improve campaign performance and support data-driven decisions, contributing to a **15% increase in reporting efficiency**.
- Designed and automated the **end-to-end weekly marketplace performance newsletter**, reducing manual reporting effort by **2-3 hours per week** while delivering actionable insights to **50+ stakeholders** across Product, Performance and Business teams.
- Communicated technical findings through structured root-cause analyses and client-ready reports, translating complex data into clear, actionable recommendations for internal and external stakeholders.

Software Engineer- Harbinger Systems, Pune

Jul 2020 – Jul 2022

- Analyzed proposed technical solutions based on customer requirements.
- Devised strategic business approaches and software solutions to support client expansion, identifying key customer segments and aligning with organizational objectives to drive growth by 25%
- Designed and executed performance testing for multiple applications to ensure optimal performance.
- Collaborated on SQL-based validation of migrated Policy Center data and reconciled ETL outputs using SQL Server and Excel to verify data accuracy and completeness.
- Monitored resolution of bugs, tested fixes and helped developers tackle ongoing problems by providing QA perspective.

KEY PROJECTS ([Visit my Portfolio](#))

- **Car insurance - fraud detection** – Using Python, implemented fraud detection models on car insurance data set with accuracy of 94% using neural networks and performed basic ETL, EDA techniques so as to make data consistent to perform data modeling techniques.
- **Data science job analysis market (Business Intelligence)** – Designed intuitive dashboards by importing datasets for data science professionals, offering insights on optimal job markets, company sizes, global prospects, experience requirements, employment types, and average salaries using reporting tools.
